Live Online via Zoom

Full \$279 Early Bird \$239 Early Bird Group \$199

Early bird savings end October 17, 2025

Elevate your therapy practice!

Are your students with ADHD engaged and thriving both inside and outside the classroom? Are you seeking proven strategies that you can seamlessly integrate into your existing interventions to help them succeed? Look no further! Adiaha, esteemed President of the Society of Developmental and Behavioral Pediatrics, is ready to equip you with evidence-informed management strategies.

She begins by laying the foundation with comprehensive insights into the DSM-V criteria, neurobiology, and the diagnostic process of ADHD. You will learn why a child you are working with might have complex ADHD, a common condition where ADHD co-occurs with other neurodevelopmental or learning diagnoses. She will reinforce the importance of being proactive practitioners to prevent the consequences of undiagnosed and untreated ADHD. Adiaha will share her Model of Executive Functions (EFs) to show how dysfunctions in EFs impact the way your students with ADHD *think, feel, and act* across various settings – be it in school, at home, or in your intervention sessions. She will then enrich your toolkit with an array of resources and interventions that work! Adiaha will provide you with multiple EF strategies to empower your students in managing their own behaviors during your sessions and in their real life! Discover ideas for ADHD-supportive classroom, effective communication and instruction, classroom behavior management, completion of class work, homework, as well as individual and group projects, self-care, and other ways to support the student, teachers, and families. Adiaha will ensure an interactive day with multiple case studies and activities throughout.

Leave this day empowered with multiple concrete strategies to help your students the very next day!

Audience: OTs, OTAs, PTs, PTAs, SLPs, & Educators

Educational Level: Intermediate

Learning Objectives

At the completion of the course, the learner is expected to:

1. Identify 3 core symptoms of ADHD
2. Select 3 symptoms or criteria that qualify as Complex ADHD
3. Determine 3 ways executive functioning disorders may impact the student's behaviors in the classroom, in your intervention session, other school environments, and at home
4. Apply 3 strategies to help students with ADHD manage their own behaviors during your intervention sessions on a given case scenario
5. Apply 3 strategies to help students engage in and be productive in various school activities and routines on a given case scenario
6. Identify 3 critical consequences of undiagnosed, misdiagnosed, untreated, and/or mis-treated ADHD

Your Mentor:

Adiaha Spinks-Franklin, MD, MPH, FAAP is a board certified Developmental-Behavioral Pediatrician. She has more than 20 years' experience in caring for children and adolescents with developmental disabilities and behavior disorders, and in training pediatric health care professionals in the US and abroad. She holds leadership positions in many national pediatric professional organizations. She identifies as Wonder Woman.

Disclosures: Adiaha receive speaking fees from Apply EBP, LLC. She has no relevant nonfinancial relationships to disclose.
